CLAS12 RG-A fall 2018, π^0 off the proton, 50 nA background
electron acceptance vs generated $\theta_{e'}$ — one card, two field directions
Born sample
Radiative sample
kinematic floor 5.27°
inbending, torus −1
outbending, torus +1
solid: found AND identified as e^-
dashed: track found, any PID
efficiency (%)
generated $\theta_{e'}$ (deg)
