Every cut variable, N−1, rad and Born MC (linear scale)

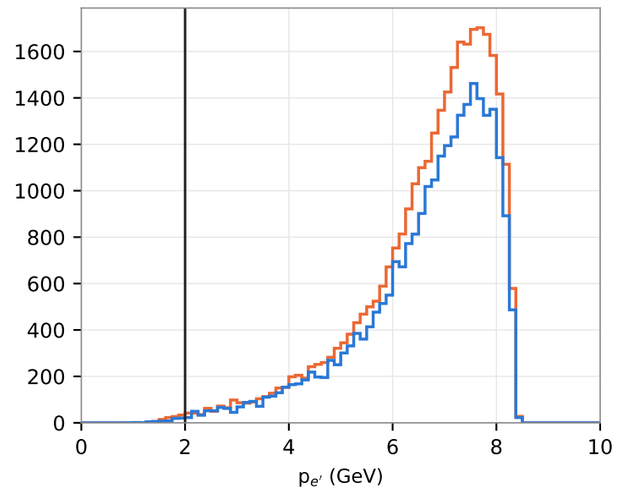

keeps: Born 81 %, rad 80 %

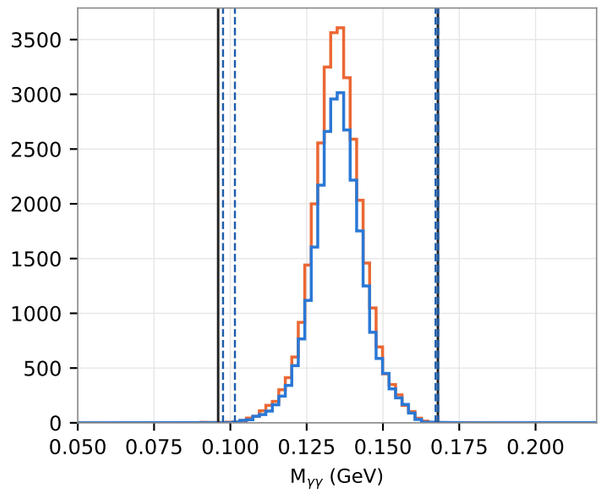

keeps: Born 74 %, rad 75 %

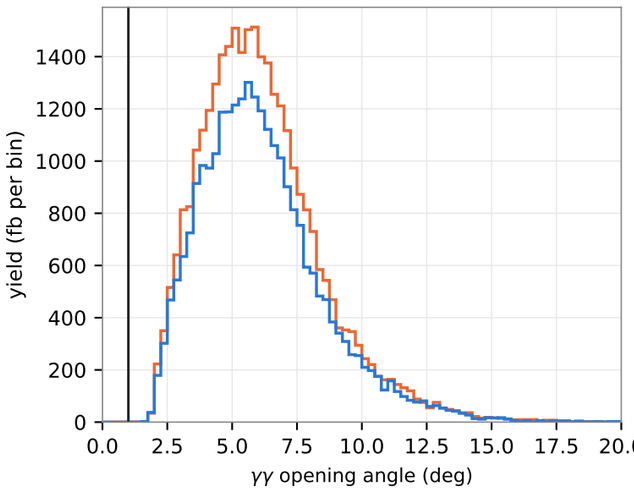

keeps: Born 100 %, rad 100 %

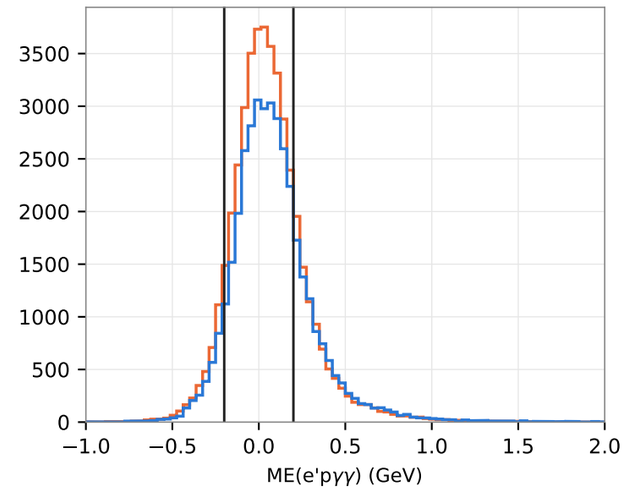

keeps: Born 100 %, rad 100 %

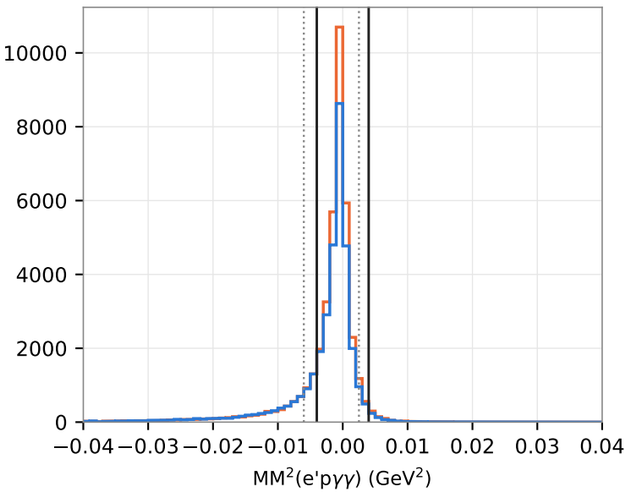

keeps: Born 100 %, rad 100 %

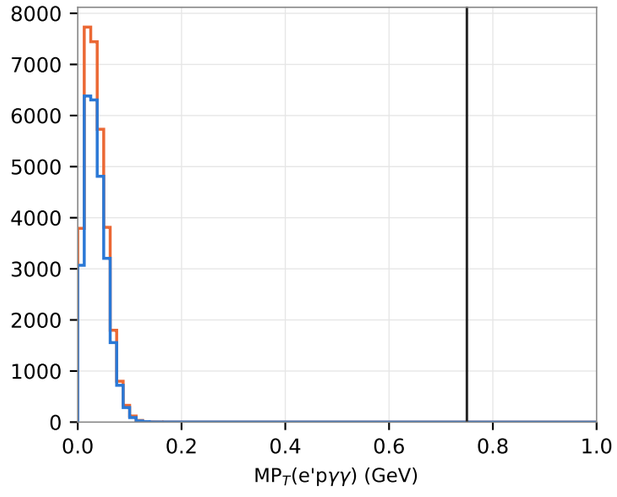

keeps: Born 71 %, rad 69 %

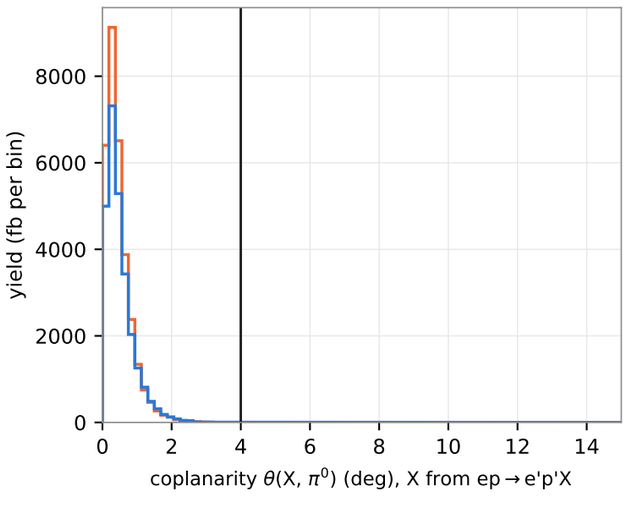

keeps: Born 80 %, rad 77 %

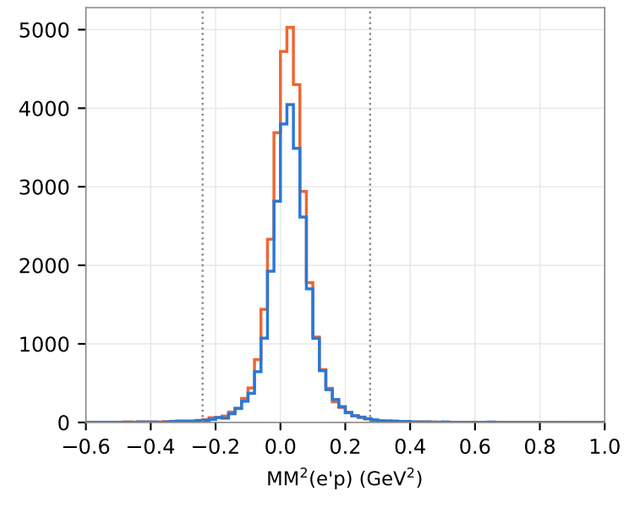

keeps: Born 100 %, rad 100 %

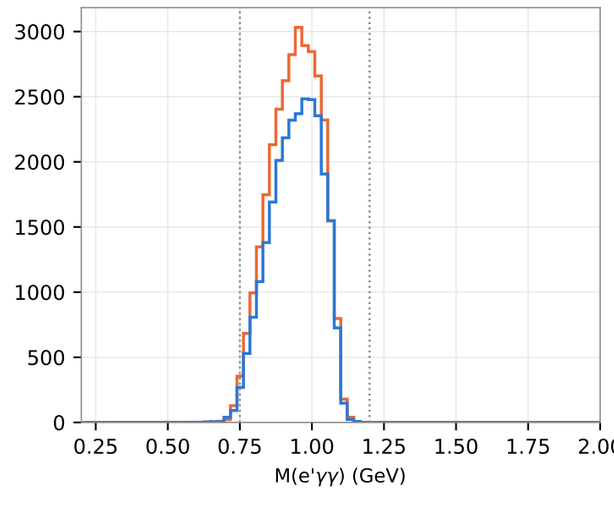

keeps: Born 100 %, rad 100 %

not cut (all cuts applied)

not cut (all cuts applied)

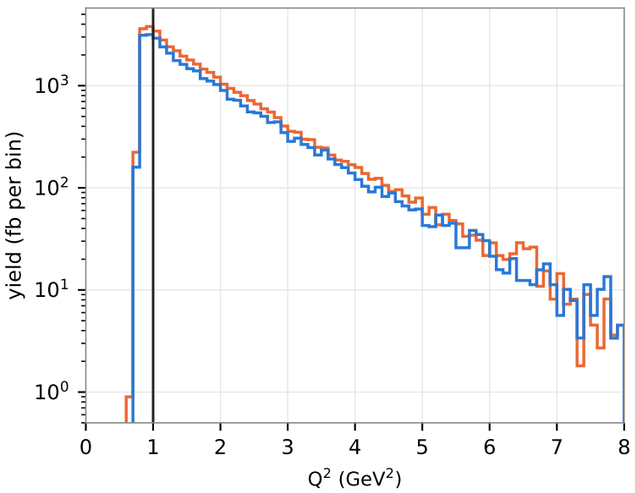

Born MC
rad MC
analysis note cut (Sec. 3.5; $M_{\gamma\gamma}$ Sec. 3.4)
applied here: $M_{\gamma\gamma}$ 3σ of MC (FD, CD)
Tables 7-10 only, not applied

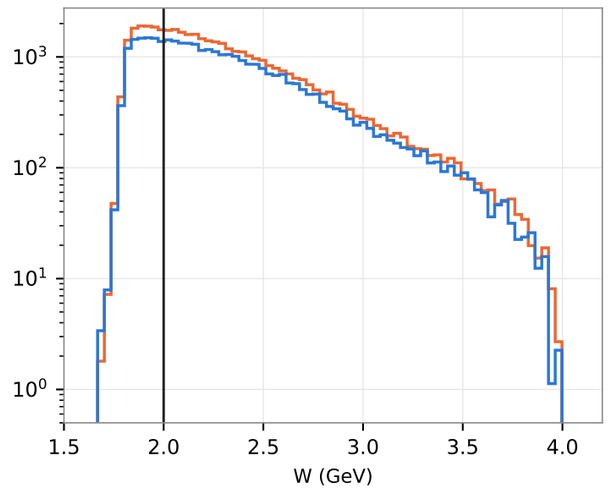

Each variable with all OTHER cuts applied (N−1).
Yield in fb per bin, all kinematics,
inbending + outbending.

Every cut variable, N−1, rad and Born MC (log scale)

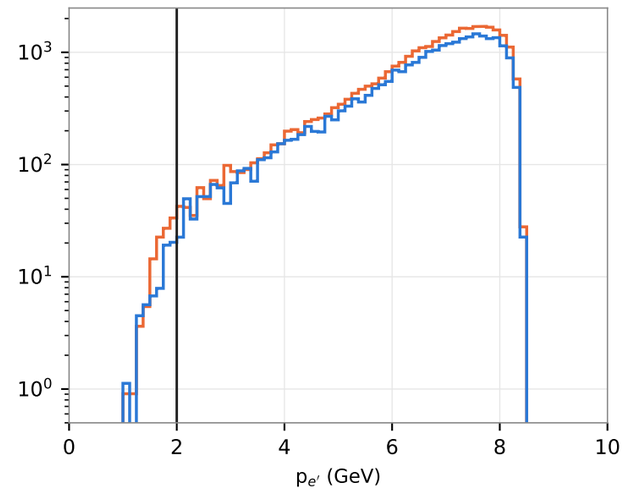

keeps: Born 81 %, rad 80 %

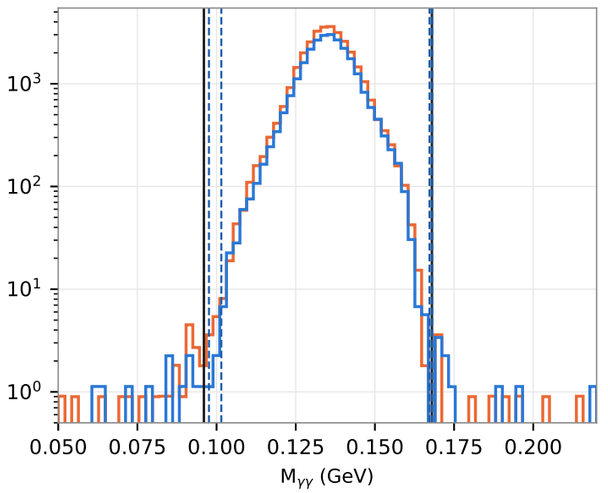

keeps: Born 74 %, rad 75 %

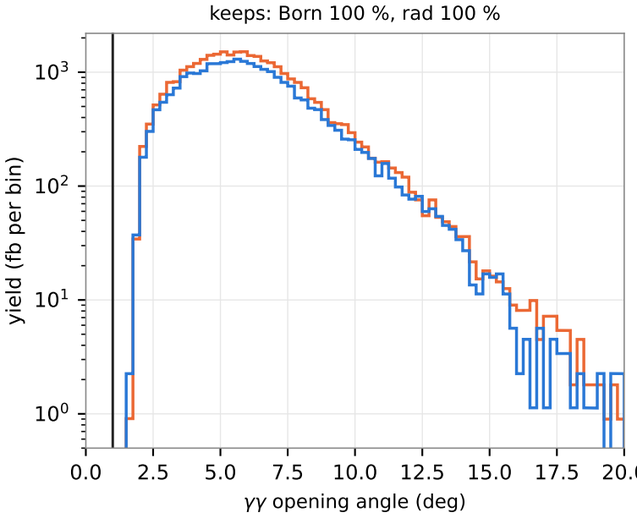

keeps: Born 100 %, rad 100 %
